

Lalit Chouhan

Full Stack Developer

lalit3chouhan@gmail.com +91 9171250851

Education

Indian Institute of Technology Roorkee

November 2021 - May 2025

Bachelor of Technology

Roorkee, Uttarakhand

- **Relevant Coursework:** Data Structures and Algorithms (C++), Front-End Development, Back-End Development

Experience

The Souled Store

July 2025 - Present

Associate Software Development Engineer

Onsite

- Fixed the logic for membership cancellation and refunds, ensuring accurate revenue recognition and preventing unnecessary losses.
- Implemented structured logging across multiple repositories, replacing print statements to enable better error tracking and debugging, reducing recurring issues by 60%.
- Designed a unified Netcore event orchestration system where all repositories send event requests through a dedicated event service, centralizing logic, enriching payloads, and ensuring consistent data flow.
- Optimized event processing within the event service by reusing existing data and writing efficient queries, improving performance and reliability of user tracking and marketing automation.

Kipps.AI

February 2025 - March 2025

Full Stack Developer Intern

Remote

- Reduced chatbot response delay and enabled reply streaming for a smoother conversational flow.
- Added image support, metadata management, and multi-reply handling to improve chatbot versatility
- Integrated OpenAI function calling to execute backend operations from AI-generated commands.
- Built a real-time dashboard with visualizations and graphs to monitor chatbot engagement and analyze WhatsApp messaging trends.

Madpackers

July 2024 - September 2024

Full Stack Developer Intern

Remote

- Engineered a travel forum backend using TypeScript, facilitating seamless experiences for daily active users.
- Incorporated OAuth 2.0, JWT, and Redux, ensuring secure sessions and robust data security.
- Architected backend, selected technologies, managed version control, boosting team collaboration by 30%.
- Connected PMS with the backend, increasing system efficiency by 25% for room availability and pricing management.

Projects

Application Deployment Engine — Typescript, React, Node.js, Express, AWS S3, Redis

November 2024

- Automated deployments with a Deployment Service integrating AWS S3 and Redis for managing build queues.
- Devised a Request Handler Service using Express to efficiently serve static files (HTML, CSS, JS) from S3
- Created an Upload Service to clone Git repositories, upload files to S3, and track deployment statuses via Redis.
- Designed a modular architecture separating upload, deployment, and request handling for improved scalability

Image Generator — Typescript, React, Node.js, Express, MongoDB, Tailwind CSS

April 2024

- Engineered a full-stack web app with Tailwind CSS, integrating Cloudinary to efficiently manage images.
- Leveraged OpenAI DALL-E API, creatively generating images from user-provided textual prompts.
- Built search functionality by prompt and username, effectively supporting a community for users.

Technical Skills

Languages: C++, JavaScript, TypeScript, HTML/CSS, Kotlin, Python, SQL

Frameworks & Libraries: React, Node.js, Express.js, Django, MongoDB, Redux, Bootstrap, Tailwind CSS, Material UI, Falcon

Tools & Platforms: Git, GitHub, VS Code, AWS, Redis, Render, Vercel, Cloudinary, OpenAI API, OAuth 2.0, JWT

Architecture & Patterns: MVVM, Modular Architecture
